1	SPVP/SBPCOE/ MECH/ RAC/RCTA/200 9-10/01	Refrigeration cycle test apparatus	Compressor Unit : 1/3 Ton of refrigeration Hermetically sealed compressor of Emulsions Copland make suitable for 134a refrigerant, Condenser Unit , Expansion Unit : Two Types of expansion devices are provided i. Thermostatic Expansion Valve ii. Constant pressure Capillary Tube, Evaporator Unit, Control Panel Unit : i. Digital temperature Indicator with selector switch with set of thermocouples are mounted on various locations. ii. Cam operated On-Off switch. iii. Voltmeter provided for voltage measurement. iv. Ammeter provided for load measurement. v. Energymeter for power measurement. vi. Auto Transformer for balance of cold effect vii. 0 to 350 PSI Pressure Gauge in delivery line. viii. -30 to 0 to 150 PSI compound Gauge mounted on suction line ix. Immersion Heater for balancing the cold effect. x. HP & LP safety cutout is used as a safety. xi. Electrically operated solenoid valve	25/05/11	01	99,900/-	99,900/-
2	SPVP/SBPCOE/ MECH/ RAC/ACCTA/20 11-12/01	Air Conditioning Cycle Test Apparatus	Compressor Unit : 1/2 Ton of refrigeration Hermetically sealed compressor of Emmelsion Copland make suitable for 134a refrigerant. Condenser Unit : Forced draft finned type copper coiled air cooled condenser with fan Expansion Unit : Thermostatic Expansion Valve motor.	26/12/11	01	91,125/-	91,125/-

			Evaporator Unit : Forced draft finned type copper coiled air cooled Evaporator. Flow Measurement Unit : Suitable range of float type glass tube rotameter is used. De-Humidifier : Electrical Heater used for removal of moisture in air. Boiler : i. Suitable Baby Boiler for steam generation. ii. Pressure Gauge used for measure the steam pressure inside the boiler. Blower : 8" , high speed Centrifugal blower. Control Panel Unit : i. Digital temperature Indicator with selector switch with set of thermocouples are mounted on various locations. ii. Cam operated On-Off switch. iii. Voltmeter provided for voltage measurement. iv. Ammeter provided for load measurement. v. Energymeter for power measurement. vi. 0 to 350 PSI Pressure Gauge in delivery line. vii. -30 to 0 to 150 PSI compound Gauge mounted on suction line viii.
